

# AQUARIUS HYDRO MECHANICAL DISTRIBUTOR CD-HM 12

The **AQUARIUS CD-HM 12** provides an inexpensive solution, as a practical complement to stationary concrete pumps, when separate concrete placing booms cannot be used to their full value. The reach of a placing boom on a truck mounted concrete pump can also be improved with the help of this distributor in the decisive last few meters to give a more extensive working range.

The placing of concrete with a distributor is just as easy as when working with the end hose of a concrete placing boom. Stable construction with no fragile or additional parts to mount, makes this unit exceptionally economical to run and maintain. The distributor is very light in weight and hence easy to transport. Moreover, a well - proven service and spares back up, make the **AQUARIUS CD-HM 12** the most preferred solution for on-site applications.

#### Technical Specifications:

|                                      |            |
|--------------------------------------|------------|
| Number Of Arms                       | 2 Nos.     |
| A Arm Length                         | 6168 mm    |
| B Arm Length                         | 5860 mm    |
| Max. Horizontal Reach<br>From Center | 12034mm    |
| Max. Vertical Reach From Floor       | 5220mm     |
| Concrete Pipeline Diameter           | 125 mm     |
| Weight of the Distributor            | 1400 kg    |
| Counter Weight Required              | 2 x 550 kg |

Aquarius Engineers manufactures a wide range of Concrete Pumps and Concrete Batching Plants at their state-of-art manufacturing plants in Goa and Pune. With a consistent focus on delivering international quality products, Aquarius offers the latest in technology from its extensive equipment portfolio. Clients have come to look upon Aquarius as their long-term partner in successful project implementations.
